Sharing Your Research Through International Conferences and Journals

JACET Academic Publications Committee

Leis, Adrian (Tohoku Gakuin U.)
Ohashi, Yukiko (Yamazaki U. of Animal Health Technology)
Haenouchi, Hiroko (Nihon U.)
Kawano, Madoka (Meiji U.)

JACET Journal and Selected Papers from the JACET International Conference stand as pillars in the domain of English language education in Japan. These annual publications showcase a diverse array of research focused on the English language and its teaching methodologies. Achieving publication within these esteemed journals represents a notable milestone for many academics. Participation in scholarly exchanges, such as oral and poster presentations at conferences, plays a pivotal role in refining research and enhancing its chances of publication. This session aims to provide participants with practical strategies to elevate their presentation skills in addition to advice for constructing an academic paper. By focusing on elements like the organization of presentations, slide and poster design, and confidence-building techniques, as well as academic paper structure, content, and APA7 referencing, we intend to equip researchers with the tools necessary to garner constructive feedback and improve their prospects of publication acceptance. Please note that this presentation includes points that were presented at the 2023 JACET International Conference held at Meiji University.
